DOIRC Meeting – April 14th, 2010

Wintershall Operations in Q4-2009/Q1-2010

Q4-2009/Q1-2010

1 x Near Miss Incident: Transporting of pipes by trucks

Near miss: Transporting of pipes, substandard truck conditions

Delivery contract was including the unloading of pipes from a vessel and delivery into the yard of a Logistic contractor. Because of a delay in the unloading of the vessel the original foreseen trucks were called away for another job. When the pipes were finally unloaded, another truck transport contractor was chosen.

Suppliers have to ensure that transport contractors are fulfilling all requested safety standards.

DOIRC Meeting – April 14th, 2010

Wintershall Near miss Pipe transportation
