DRILLING OPERATIONS INCIDENT REVIEW COMMITTEE

DOIRC # 29

23rd November 2011

FIRE EXITS AND MUSTER POINT

**MUSTER POINT
(CAR PARK)**

If you have not done so, Please turn your
Mobile/Pagers to **silent / meeting** mode.

Thank You

IF IT IS NOT SAFE

IF ITS NOT SAFE – STOP

All QP and Contractor employees working for the Drilling Department are **empowered and required** to take responsibility for their personal safety.

Any employee may stop the work process if they feel their personal safety or the safety of the work team is compromised.

When an employee contacts his immediate supervisor concerning an empowerment issue, the supervisor must consider the safety issue as legitimate. The supervisor has 2 options:

- Correct the safety issue immediately
- Protect the risk or hazard & develop a correction plan

You have the responsibility and you can make a difference

ACCIDENTS ARE PREVENTABLE

11.1.2005
TALIB A. AL-MURRI
DRILLING MANAGER
QATAR PETROLEUM
JANUARY 2005
